

NEW TEST OFFERINGS

Bordetella Pertussis, DNA Amplified

WMPL is pleased to announce that we will now offer illumigene® **Bordetella Pertussis, DNA Amplified** testing. This is the only FDA- cleared stand-alone molecular assay for Bordetella Pertussis. The test provides 87.8% sensitivity and 97.8% specificity.

Test Code	CPT Code	Specimen Requirements
284	84305	Nasopharyngeal (NP) swab

Cystatin C

WMPL will now be running the **Cystatin C** assay, on the ADVIA 1800 system. Cystatin C test can be used to screen for and monitor kidney dysfunction in those with known or suspected kidney disease. The test is a highly specific and sensitive marker of renal function.

Test Code	CPT Code	Specimen Requirements
1254	82610	Minimum 1 mL serum
